molekularnu biologiju

u suradnji s

Hrvatskim društvom za nefrologiju, dijalizu i  
transplantaciju Hrvatskog liječničkog zbora

vas poziva na predavanje

# “The podocyte actin cytoskeleton as a druggable target”

koje će održati

**prof. dr. sc. Sanja Sever**

(Harvard Medical School, Nephrology Division,  
Massachusetts General Hospital, Charlestown, MA, SAD)

u srijedu 6. ožujka 2019., s početkom u 14:00 h  
u dvorani Wickerhauser Medicinskog fakulteta,  
Šalata 3b, Zagreb.

*...“The talk will focus on the role of podocyte structure and function in glomerular diseases as well as the role of the actin cytoskeleton with regard to podocyte structure and function. In addition, I will cover the latest ideas regarding development of the novel treatments for CKD patients by targeting actin cytoskeleton dynamics in podocytes with the focus on the role of the GTPase dynamin as a proof of the concept.” ...*

Veselimo se vašem dolasku!
